

**Technology:** [Molecular tweezers for the treatment of amyloid-related diseases](#)

**VA ID Number:** 00-002

**Inventor:** Sally Frautschy

**Location:** Los Angeles, CA

**Topic:** Other

**USPTO Issue Date:** 8/5/2014

**Patent Number:** 8,791,092

The VA has joint ownership with The Regents of the University of California, Oakland, Massachusetts Institute of Technology and Universitat Duisburg-Essen

**Contact:** [lee.sylvers@va.gov](mailto:lee.sylvers@va.gov)

**Abstract:** This invention provides novel compositions to inhibit the aggregation of amyloid proteins. In various embodiments the compositions comprise a molecular tweezers that binds lysine and/or arginine and thereby inhibits the aggregation of amyloidogenic proteins. ##STR00001##
