The CART Research Study

Participate in a study exploring how technology supports the aging process

You may be eligible if you:

- Live independently or with a partner
- Are at least 62 years old
- Are a veteran

What is Involved:

- Continuous measurement of activity patterns, by using motion sensors placed in your home and devices like a digital watch, scale and pillbox.
- In-home physical and cognitive assessments
- Compensation is provided at $100 per month

The Collaborative Aging (in Place) Research using Technology (CART technology to assess activity in a home, with the hope of helping people remain independent as they age. By participating in this three-year long study, contributing to the development of future devices that aim to increase the quality of life of older adults who may live far from medical clinics and hospitals.
