Dr. Gabriel Gonzalez is completing a fellowship in research biology at the VA Boston Healthcare System. His main interest is in stem cell biology and regenerative medicine, or the process of replacing, engineering, or regenerating cells, tissues, or organs to restore normal function. He’s researching how stem cells can be used to repair skin and the cornea and has authored 15 papers.

After the 9-11 terrorist attacks on the United States, Gonzalez served for four years in the Air Force as a medical laboratory specialist. He was awarded the Global War on Terrorism Service Medal.
