BRAVE Technology Transfer Funding
FY25 Program Announcement

Part I - Overview Information

Participating Organization(s): VA Technology Transfer Program (TTP) BRAVE Funding.

Announcement Type: Supplemental funding to develop VA-owned technologies toward commercialization/partnering. 
https://www.research.va.gov/programs/tech_transfer/brave.cfm

Key Dates*
RFA Preview Teams Meeting Thursday, March 28, 2024 @ 2pm Eastern
Click here to join Teams Meeting
RFA Release/Posted Date: April 8, 2024
LOI Q&A Thursday April 18 @2pm Eastern
Click here to join Teams Meeting
LOI Submission Deadline: May 7, 2024 11:59pm Local Time
Invitation to Apply: June 8, 2024
Invitee Application Q&A: June 13, 2024 @2pm Eastern
Click here to join Team Meeting
Application Deadline: July 8, 2024 @11:59am local time
Just in Time Letter Date: September 1, 2024
Start Dates: October 1, 2024, or contingent upon available funding
End Date: September 30, 2025 (all funds must be used/encumbered by this date – this is a short-term commercialization award)

Submission Process: Applicants must submit a Letter of Intent (LOI) to be considered for application (you must contact your Technology Transfer Specialist for LOI submission information - Technology Transfer Program Contacts (va.gov)). After LOIs are reviewed, invitations to provide a full application will be e-mailed. Full applications will be submitted electronically through the VA’s Sophia Knowledge Management System.

Part II – Funding Opportunity Description

1. Award Objectives

The VA TTP funds continued innovation of VA-owned technologies that require gap funding, go/no-go decisions, proof of concept, and commercially driven research that will better position the technology for partnering with companies for the benefit of the veteran and broader use in the United States.

Specifically, a BRAVE project should fall into one of the following categories:

• Minimum Viable Prototype production
• Prototype testing
• Clinical grade prototype production
• Chemical synthesis and testing
• in vitro proof of concept testing
• ex vivo proof of concept testing
• in vivo animal model testing
• Pharmacokinetic or pharmacodynamic testing
• Clinical pilot study
• Equipment and/or reagents to develop a prototype or to support one of the above categories
• Other commercially relevant aims

2. **Mechanism of Support**

   This funding mechanism is a short-term intramural award to support the pre-commercial development of inventions made at and owned by the VA.

3. **Funds Available**

   Total budget: Budgets should be capped at $100,000 and should be commensurate with the project goals. For clarity, investigators should only budget what is truly needed to complete the pre-commercial study. Budget appropriateness will be part of the review criteria. See Appendix A, Example Budget.

   Duration of Award: Awards must be completed in the fiscal year in which the award begins.

   Budget Limitations: No more than $50,000 of the budget should support salary. Travel will be allowed with a maximum of $2500 of the budget allocated to travel, conference fees, or other related travel costs.

   Exceptions to the Budget Cap and/or Duration: Rare exceptions to the budget cap and/or maximum duration may be granted. The application submission must provide fully justified and compelling circumstances for a waiver and have approval of their local Technology Transfer Specialist.

   All VA funding regulations apply to use of funds per Handbook 5005, Part I, Chapter 3, Section 2 (I)) “Indirect administrative costs associated with preparing and maintaining payroll records, developing reports, negotiating the IPA agreement, office space, furnishings, supplies, staff support, and computer time are prohibited.”

   *Requested funds should not duplicate any other VA, Federal, State, or Private funding.

**Part III – Eligibility Information**

1. **Eligible VA Institutions**

   Applications may be submitted from any VAMC with an active Federal-wide Assurance (FWA) of compliance with the U.S. Federal regulations for the protection of Human Subjects in research.

2. **Eligible Individuals**

   The BRAVE Award Program is an intramural program to fund research conducted by VA-salaried investigators at VAMCs or VA-approved sites – including researchers or clinical staff that have or can obtain a research appointment prior to funding. The Technology Transfer Program may partner the investigator with another investigator if there is a need
for additional skill sets to complete the project. This could include, but is not limited to,
partnering with one of the VA’s Technology Transfer Assistance Programs (TTAP) sites –
discuss prototyping with your Technology Transfer Specialist.

Part IV – Application and Submission Information

1. Letter of Intent

A LOI is required for the BRAVE funding opportunity. Please reach out to your
Technology Transfer Specialist to discuss the suitability of the proposed project and to
obtain the required LOI form. Technology Transfer Program Contacts (va.gov)

2. Content and Form of Application Submission

The following sections will be included in the on-line application if invited to apply
following the LOI submission:

a. Project Abstract

Please provide a brief lay description of your project (need, solution, project cost).
Indicate the date of consult with your TTS. (250 words)

b. Intellectual Property Information

1) Title of the Invention Disclosure(s) and VA ID Number(s) (please consult with TTS
if not known)
2) Is this IP subject to an existing license, option to license, or any other agreement
(e.g., sponsored research agreement, CDA/NDA, MTA, SBIR, etc.)? Be sure to
check with your VA TTS and your University Affiliate tech transfer office if you are
a dual appointee. If yes, please provide an explanation and details.

c. Current Technology Readiness Level

How will this proposal enhance the technology readiness level (TRL) of the
innovation? (limit to 200 words)*. What is the current TRL and what is the expected
TRL of the invention be at after completion of the proposed project?

Information on TRL can be found on our website. You can also discuss with your
TTS. (https://www.research.va.gov/programs/tech_transfer/Biomedical-TRL-
Guideline-Sheets.pdf).

d. Background, Significance, Unmet Veteran Need and Solution:

1) a summary understanding of the problem to be solved and/or the quality-of-life
issue to be addressed (100 words).
2) a summary of the standard of care and/or currently available solutions, and*(Limit
to approx. 100 words)
3) a description of your technological solution and the current state of your research thus far completed. What has been done, if anything, to test this technology* (Limit to approx. 250 words)

4) describe the population that this technology would serve. Please provide information about the number of potential patients that could be impacted and type of patient (veteran, general population, etc.) (Limit to approx. 100 words)

e. BRAVE Study Selection and Goals: (Limit to approx. 350 words)

TTP recommends focusing on a single, short-term, aim/objective/outcome and a technical approach aligned with the intent of the BRAVE funding program.

1) Please provide a lay description of the study or experiment set to be performed using BRAVE funds.

2) Explain why this study or experiment set was selected and how it may advance the technology along the commercialization journey. Studies or experiments that lead to a “pursue, pivot, or pause” decisions are encouraged.

f. Risk: (Limit to approx. 200 words)

Describe the technical risk, decision points, and risk mitigation efforts in executing the technical plan and achieving the desired goals. This includes likelihood that the proposed study will answer the commercial questions, the risk to patients (if applicable), etc. Work with your TTS if needed to understand this question.

g. Proposed Budget Justification and Timeline:

a. Attach an itemized budget including an explanation/justification for each line item. (Use the attached Appendix A Budget Template – you will attach as a pdf file)

b. Attach a detailed project timeline, including milestones, planned reviews and estimated completion date. GANTT style charts are encouraged. You will upload this as a pdf file.

c. If the proposal requests more than $100K or with timelines exceeding 1 year, will be subject to additional scrutiny. Please provide a compelling narrative. Budgets will be reviewed to ensure the costs are commensurate with the project aims and outcome. For example, if a prototype cost is $25,000, then that amount should be requested. Budget feasibility will be part of the review process.

h. Potential Commercial Partners

a. Include 2-3 potential licensees for this technology.

b. Has this technology been reviewed by a company and input provided? Commercial interest/feedback can lend support to a BRAVE application. Letters of support from companies should be written on company letterhead and may be attached to your application. NOTE: speak with your TTS BEFORE speaking with companies to ensure confidentiality agreements are in place prior to sharing information with any party outside of the VA.
*Certify that the above information is accurate and correct, and that the funding proposal does not overlap with any current or previously funded research.

**Part V – Review Criteria**

Research Project Evaluation Criteria Reviewers will consider the following questions when reviewing applications.

- Is VA Lead on the Technology or an affiliate?
- Budget commensurate with need
- Likelihood that proposed project will improve overall value of the technology
  patent or licensing concerns
- Technology relation to the VA mission and Veteran population
- Value of technology overall (market value)
- Other: prior commercial interest/feedback, feasibility

**Other Considerations**

If any approvals, including but not limited to, IACUC, IRB, ISSO, COI, contracts, etc. are required to complete the BRAVE project, these must be obtained prior to funds being sent to the site. Investigators should start the appropriate process at the time of BRAVE application with a completion/approval date no later than December 29, 2024.

**Part VI – Award Administration Information**

1. **Award Notices**

Just in time (JIT) notices will be sent out via e-mail to the investigator prior to or on September 1, 2024.

2. **Administrative and National Policy Requirements**

Research Integrity: VA is committed to the highest standards for the ethical conduct of research. Maintaining these high ethical standards requires that VAMCs and investigators applying for (and receiving) BRAVE have appropriate procedures to prevent unethical research practices.

As a condition of accepting the award, the investigator and others associated with the research must:

- Subscribe to accepted standards of rational experimental research design
- Accurately record data and provide reports to VA TTP at the end of the award and at other times upon request of the VA TTP
- Conduct unbiased data reporting
- Respect the intellectual property of other investigators
- Adhere to established ethical codes and legal standards for protecting Human and Animal Subjects
- Properly manage research funds

Deliberate falsification or misrepresentation of research data will result in withdrawal of an application, possible suspension or termination of an award and, potentially, suspension of the investigator’s eligibility to submit applications to VA-ORD.
Acknowledging VA Research Support: By accepting a BRAVE Award, the investigator agrees to properly acknowledge VA affiliation and support in all public reports and presentations (see VHA Directive 1200.19). Failure to acknowledge VA affiliation and support may result in termination of the award. The following text should be used “This research was supported by BRAVE funding from the U.S. Department of Veterans Affairs (TTP-XXX-XXX), Technology Transfer Program.”

Intellectual Property Rights: By accepting a BRAVE award, the investigator agrees to comply with VA policies regarding intellectual property disclosure obligations and Federal Government ownership rights resulting from the proposed work (see VHA Directive 1200.18).

Part VII – TTP Contacts

All questions should be directed to the Technology Transfer Specialist that handles your state or region: https://www.research.va.gov/programs/tech_transfer/contacts.cfm

FAQs

- **What can the funding be used for?**- BRAVE funding monies can be used for the same purpose as all other VA research funds.
- **Can the funding be used for salary?**- BRAVE funds can be used to support salaries as long as the investigator is eligible to receive salary from the VA or is eligible to receive funds under an IPA.
- **Can this be used to pay for non-US citizens?** Salary support is only available for individuals who are VA employees or eligible for IPA. Students are not eligible for IPA positions per VA policy.
- **Can the funding be used to purchase equipment or reagents?** – Yes. BRAVE funds can be used to purchase equipment and reagents as long as these are necessary for the proposed project.
- **Are progress reports required?**- Yes, progress reports are due 30 days from project end date.
- **Do teams participating in VA-TEAMS get special consideration?**- This is not currently, part of the review criteria; however, former VA-TEAMS participants may be better able to formulate pre-commercial proposals.
- **Is there an appeal process** – there is no appeals process. However, where appropriate, we will instruct promising projects to reapply, or participate in VA TEAMS or the Spark, Seed, Spread programs.
- **Spark Seed Spread – can I do both?**- Yes; however, the BRAVE funding proposal must be addressing a unique pre-commercial problem.
- **How long do I have to spend BRAVE funds?** – BRAVE funding is one-year funding so must be spent within FY24.
- **What happens if I can't spend it all in FY24?**- If there’s any doubt, let TTP and your ACOS know ASAP to ensure alternate project aims can be developed or the funding can be re-allocated.
- **Do I need to comply with standard regulatory and compliance reviews?** Yes, if your project requires compliance (R&D review, IRB, ISSO, IACUC, etc) approval must be obtained by Dec 29, 2024.
• **Can I make any changes to the project aims?** - Aims may be altered until the application deadline. If project aims need to be altered after funding is awarded, please consult with your TTS to determine if the new aims are still appropriate to the RFA.

• **Does the VA need to be the Lead Party?** - VA Led technologies will be given priority, but Affiliate Lead technologies will still be considered.

• **What can I do if I have submitted a proposal before and it was not funded?** You are welcome to resubmit a previous proposal. Please work with your TTS to strengthen your application.
