CORE RESEARCH AREAS
The VA supports research in a wide variety of fields including:

- THERAPEUTICS
- DIAGNOSTICS
- RESEARCH TOOLS
- MEDICAL DEVICES
- MENTAL HEALTH
- REHAB/ASSISTIVE DEVICES

Check out our website to see all VA inventions available for licensing:

**TYPES OF LICENSES**

Many of the VA’s patented technologies are available for licensing and TTP will help you navigate the licensing process. To license a VA technology, you can negotiate an **Exclusive** or **Non-Exclusive** license.

You can also collaborate on a research project at the VA by entering into a **Cooperative Research and Development Agreement (CRADA)**. Collaborators benefit from VA investigators’ expertise in discovery and innovation and also receive an option to negotiate an exclusive license to any resulting CRADA subject inventions.

To transfer tangible research materials to or from the VA, you can use a **Material Transfer Agreement (MTA)**.

---

**APPLY FOR A COMMERCIAL LICENSE**

TTP aims to “Bring Research Advancements for Veterans to Everyone” and we can only achieve this goal by licensing VA innovations to commercial partners. In order to start the licensing process, please contact your regional Technology Transfer Specialist (TTS) who will help guide you through the process.

If you wish to obtain an **Exclusive** license, you will need to submit an application to TTP. All information submitted in the application is confidential and will not be shared with any outside parties. In order to grant an **Exclusive** license, TTP must publish a notice in the Federal Register and allow for a 15-day response period.

---

**JOIN US TO BE BRAVE!**

Visit the TTP website to see all VA inventions that are available for licensing. You can search our list of patented technologies by topic and can download technical summaries for these inventions.

Once you identify a VA invention that you would like to license, contact your regional TTS who will work with you to establish the terms for your license agreement.

You will need to submit a business plan that provides an overview of how you plan to commercialize the licensed invention.

Negotiate the terms of the license with TTP. Most VA licenses are royalty-bearing and will contain a provision for patent cost reimbursement.

Deploy your business plan to commercialize the licensed VA invention and...

---

**1-ON-1 ATTENTION FOR ONE-OF-A-KIND INNOVATIONS**

Licenses are individually negotiated and will contain terms concerning the duration of the license, the royalty distributions, reporting duties, and commercialization requirements. All license terms are strictly confidential.

Contact your regional Technology Transfer Specialist (TTS) with any and all of your licensing questions. We will help you to determine what type of license agreement is best for you!
