Technology: Enhancement of bone morphogenic protein (BMP) retention with BMP binding peptide (BBP)

VA ID Number 09-137

Inventor: Samuel Murray

Location: Los Angeles, CA

Topic: Genomics

USPTO Issue Date: 7/07/2015

Patent Number: 9,072,709

The VA has joint ownership with The Regents of the University of California

Contact: lee.sylvers@va.gov

Abstract: The use of autogenous bone graft is the current gold standard in the 1.5 million bone-grafting surgeries performed annually in the United States. Although this practice has resulted in high rates of fusion success, it is associated with increased operative time and blood loss, along with a significant degree of donor-site morbidity. Additionally, in certain settings such as revision cases, multilevel constructs, or in patients with medical comorbidities, autogenous bone graft may exist in limited quantity and quality. This significant need for a suitable alternative to autogenous bone graft has stimulated great interest in the exploration of bone graft substitutes and extenders.
