Technology: Systems and method for driving evaluation and training

VA ID Number: 14-111

Inventor: Rory Cooper

Location: Pittsburgh, PA

Topic: Rehab/Assistive Device

USPTO Issue Date: 4/18/2017

Patent Number: 9,623,875

The VA has a joint ownership interest with the University of Pittsburgh

Abstract: A system for evaluation of an operator of a vehicle including a steering system under observation of an evaluator within the vehicle includes a steering sensor system adapted to measure intervention of the evaluator in operating the steering system. A method for evaluating vehicle control of a driving entity of a vehicle under observation of an evaluator in the vehicle includes providing at least one sensor system adapted to measure intervention of the evaluator in operating the vehicle.
